(A) Near-future C1 prediction

C1 = Empty Close / Missed Grasp (fingers close with nothing between them)
C1 onset = the env step at which C1 starts

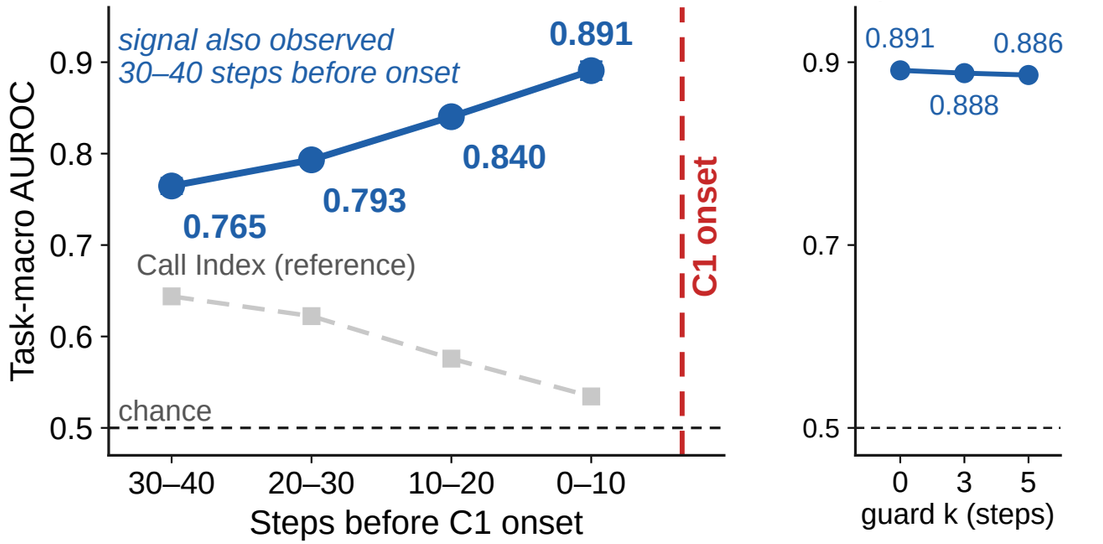

(B) Near-future C1 is predictable from π0.5 internal representations

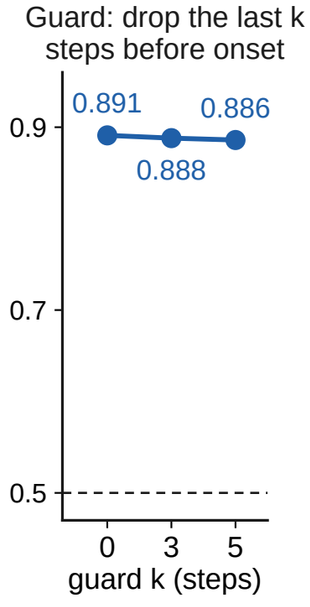

200 rollouts · H = 10 env steps · linear probe per representation

(C) Predictive signal before C1 onset

Action Expert (suf_mean) · AUROC per distance bin

(D) Example rollout: libero_object_t6_i39

"pick up the butter and place it in the basket" · out-of-fold score (task held out)
